JEKKO USA AND JMG USA ANNOUNCE DEALERSHIP AGREEMENT WITH WOOD'S POWR-GRIP *Vacuum lifters to expand materials-handling offerings to Jekko and JMG minicrane customers*

Baltimore, Maryland— Baltimore-based Jekko USA and JMG USA announced today that they have entered into a new agreement with Montana-based Wood's Powr-Grip (WPG) and will now be an official dealer throughout Jekko USA and JMG USA's national sales and distribution channels. Jekko USA is the exclusive U.S. distributor of Jekko minicranes, and JMG USA is the exclusive U.S. distributor of JMG pick-and-carry cranes.

WPG designs and manufactures a full line of hand-held vacuum cups, below-the-hook vacuum lifters and vacuum mounting cups that make materials handling and equipment mounting easier. WPG products are used to lift, hold and position a variety of smooth, nonporous materials such as glass, sheet metal, laminates, stone slabs and more.

"Jekko mini cranes and JMG pick-and-carry cranes are used to do a great deal of glass, metal, stone and other materials handling – on both interior and exterior projects," says Mike Brooks, Jr., project manager at JMG USA. "WPG is an industry leader in vacuum cups, and partnering with them significantly expands the handling options for our customers."

Adding WPG's products to the lifting capabilities of a small crane is both efficient and economical says Lisa Hagel, WPG's marketing coordinator.

"When you combine the range of unique functions of a mini crane with the variety of uses of our vacuum lifters, it gives contractors cost-effective lifting solutions for installing glass, erecting steel, and more," she says. "It's a great match."

For more information about this partnership, contact Jekko USA at (800) 670-4103, JMG USA at (800) 632-7226 or visit the [JMG USA](http://www.jmgusa.com) or [Jekko USA](http://www.jekkousa.com) websites.
